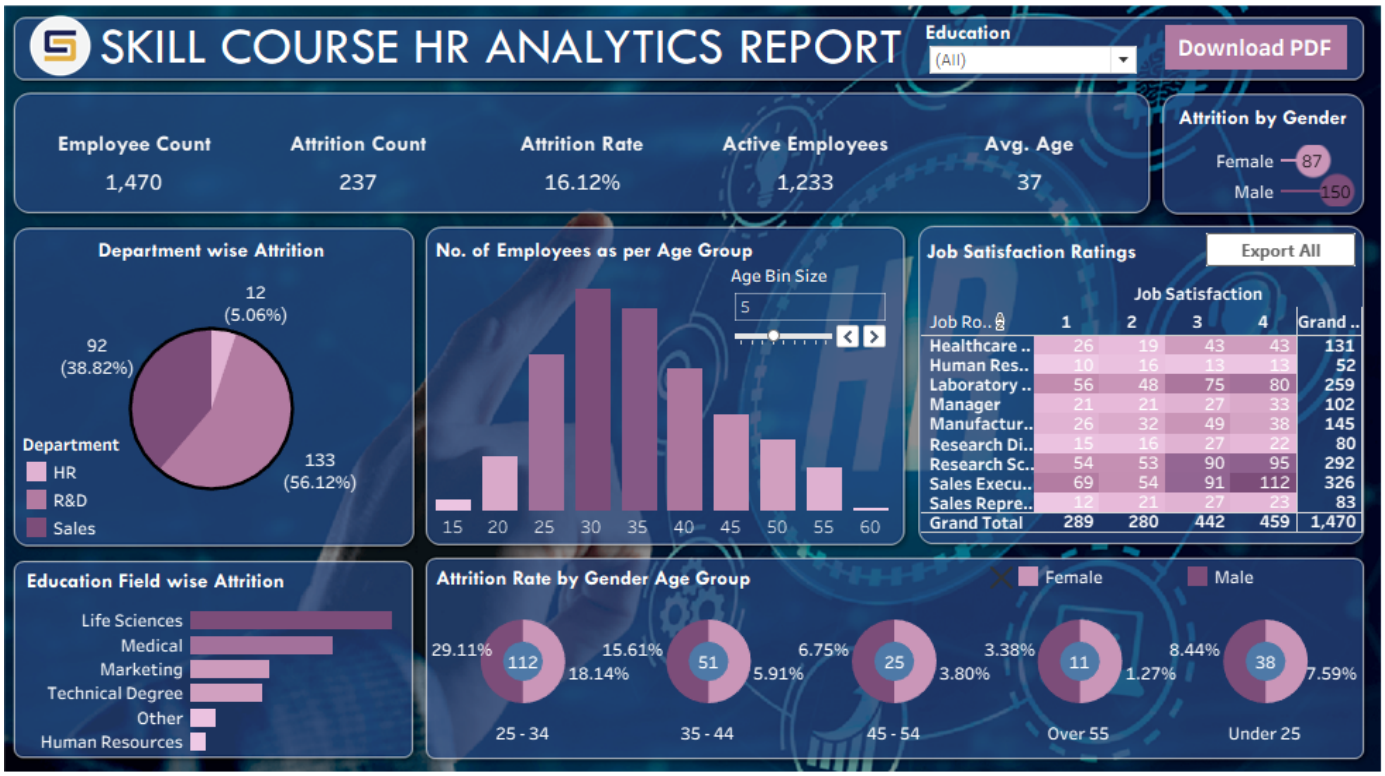
HR Analytics Dashboard – Questions, Answers & Actions



---

1. What is the overall status of the workforce?

Answer:

- Total Employees: 1,470
- Active Employees: 1,233
- Attrition Count: 237
- Attrition Rate: 16.12%
- Average Age: 37 years

Action Needed:

- Monitor attrition trends monthly.
- Maintain employee engagement programs to keep attrition under control.

---

2. Which department has the highest attrition?

Answer:

- R&D; department has the highest attrition with 133 employees (56.12%).
- Sales follows with 92 exits (38.82%).

- HR has only 12 exits (5.06%).

Action Needed:

- Conduct pulse surveys in high-attrition departments.
- Review workload, compensation plans, and work pressure.
- Improve onboarding and mentoring programs.

---

3. Which age group has the highest number of employees?

Answer:

- Maximum employees belong to the 30–35 age group.
- The workforce is primarily young to mid-career.

Action Needed:

- Offer leadership and career development programs.
- Provide skill-upgradation opportunities.

---

4. Which age group has the highest attrition?

Answer:

- The 25–34 age group has the highest attrition with 112 exits and an attrition rate of 18.14%.
- This group forms a major portion of the workforce.

Action Needed:

- Increase recognition programs and growth opportunities.
- Conduct one-on-one feedback interviews.

---

5. What does gender-wise attrition indicate?

Answer:

- Male attrition: 150
- Female attrition: 87
- More males are leaving the company.

Action Needed:

- Evaluate whether certain male-dominated roles have higher pressure.
- Improve work-life balance policies.

---

6. Which education background has the highest attrition?

Answer:

- Highest attrition: Life Sciences (89) and Medical (63).
- Lowest attrition: HR background (7).

Action Needed:

- Analyze job-role alignment for Life Sciences and Medical employees.
- Provide better career growth opportunities.

---

7. How satisfied are employees across different job roles?

Answer:

- Sales Executive and Laboratory Technician roles show good satisfaction ratings.
- Some managerial and HR roles show lower satisfaction.

Action Needed:

- Conduct job-role-specific satisfaction surveys.
- Improve manager–employee communication.

---

8. What is the employee distribution across gender and age groups?

Answer:

- Under 25: Attrition 8.44%
- 25–34: Highest attrition (18.14%)
- 35–44: Moderate attrition (15.61%)
- 45–54: Low attrition (3.80%)
- Over 55: Lowest attrition (1.27%)

Action Needed:

- Focus retention strategies on employees aged 25–34.
- Provide senior employees with stability programs.

---

9. Is the attrition rate alarming?

Answer:

- At 16.12%, the attrition rate is slightly higher than the recommended industry benchmark.

Action Needed:

- Implement early warning systems using HR analytics.
- Strengthen manager training for high-attrition departments.

---

10. Which segments contribute the most to overall attrition?

Answer:

- Department: R&D;
- Age Group: 25–34
- Education: Life Sciences & Medical
- Gender: Male

Action Needed:

- Create targeted retention programs for high-risk groups.
- Improve onboarding, mentoring, and career pathing.

Final Summary

The dashboard reveals that attrition is concentrated mainly in the R&D; department, especially among employees aged 25–34, males, and employees from Life Sciences and Medical backgrounds. Addressing workload, career growth, job satisfaction, and employee engagement can significantly reduce attrition and improve workforce stability.
